

Swift and flexible solution for patron self-service

Each patron at the library has different needs when it comes to time spent at the library and checking out materials.

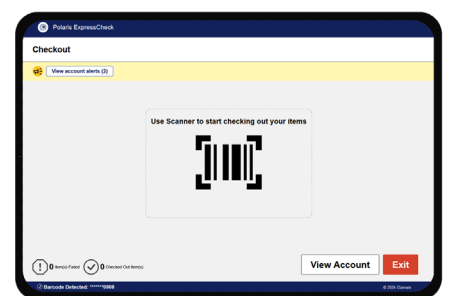

Polaris ExpressCheck is an intuitive, cost-effective solution that gives patrons the choice for a quick and convenient self-check for library materials. This frees staff to give more time to other services of patrons who need additional help.

Library Customization & Personalization

ExpressCheck enables libraries to offer flexible and customizable self-service stations. It works with the library's choice of hardware, can be implemented quickly, and scaled to addition stations and branches easily.

The system supports various circulation options, including checkout only or detailed patron information views, and customizable security settings such as PIN requirements

and restrictions based on fines or overdues. This cost-effective solution enhances efficiency while leveraging Polaris' robust capabilities.

Benefits of ExpressCheck

Polaris
ExpressCheck...
frees staff
to give more
time to patron
services.
