

Recollect

# Unlock the Power of Digital Collections with Innovative and Recollect

## Preserve, Discover, and Engage with Your Community

Innovative, from Clarivate, is proud to partner with Recollect, a highly configurable cloud-based digital asset management (DAM) platform that empowers libraries, archives, and cultural institutions to preserve their collections, enhance discoverability, and engage their communities like never before.

### Why Recollect?

Recollect goes beyond traditional DAM solutions by enabling organizations to build their identity, manage unique content, and connect with users through interactive experiences. With a scalable SaaS model hosted on AWS, Recollect provides a seamless, global solution for institutions of all sizes.

### Key Capabilities

**Discover** — Advanced metadata linking automatically connects records, improving searchability and contextual discovery.

**Access** — A single digital repository allows users to explore all content types, from any device, in any format.

**Engage** — Storytelling tools, interactive exhibitions, and crowdsourcing capabilities bring collections to life.

**Manage** — Streamlined workflows simplify data organization, access control, and reporting.

**Preserve** — Digital preservation tools ensure long-term security and integrity of collections.

"Enabling  
organizations  
to build their  
identity, manage  
unique content,  
and connect  
with users "

## Designed for Libraries & Cultural Institutions

Recollect supports a wide range of collections, including:

- ✓ Rare and non-published materials (index cards, registers, ephemera, physical objects)
- ✓ Historic photograph collections and maps with geospatial referencing
- ✓ Multimedia archives, oral histories, and digitized newspapers
- ✓ Community-driven contributions with moderation controls

## Enhancing Library Experiences

- **Curated Discovery Pathways** — Tailor the user experience with structured discovery that meets the unique needs of your audience.
- **SEO-Optimized & Mobile-Ready** — Ensure collections are easily found online and accessible anywhere.
- **Optical Character Recognition (OCR)** — Convert text into searchable data, unlocking the full potential of your archives.
- **Flexible Metadata & API Integrations** — Seamlessly connect with existing library systems, including Polaris and Sierra.

## Partner with Innovative & Recollect Today

Transform your digital collections with cutting-edge tools designed for engagement, preservation, and seamless access.
