

Build a library website the way you dreamed it

Your library services and resources are constantly evolving to meet the unique needs of your community, and your library website should be able to keep pace. Vega WebBuilder offers a website building tool that's easy to use without relying on an IT team, flexible enough to integrate account management and other tools, and worry-free because we take care of the hosting and security.

Unify your library resources

Vega WebBuilder helps you create a unified ecosystem for all library resources, services, and additional platforms. With Vega WebBuilder, visitors can search your website and find what they're looking for from collection materials to upcoming events or external databases. The library website serves as the hub for library resources and anchors all activity in one place.

With Vega WebBuilder, you can:

- Easily update and manage your website to reflect current design trends
- Capture the attention of today's users
- Promote resources, services, and programs to the entire community
- Protect user data while offering a more personalized experience
- Use automated tools to create integrations, translate content, and check for accessibility and SEO performance

What you get

Vega WebBuilder's intuitive interface lets you create a library website that fits your vision, update it anytime, and manage the full patron experience, regardless of your level of tech expertise.

- **Unified ecosystem**

Build your digital curb appeal by centralizing library subscriptions, resources, events and more into one hub: the library website. Connect with patrons and promote all the library has to offer from mobile apps to newsletters, makerspaces and more.

- **Drag and drop editor**

Website editor lets you create, modify, and arrange your web pages easily. With thousands of free images, pages, and section elements, you are able to edit everything to match your brand. Take your website to the next level.

- **Custom domain support**

Easily connect your domain to your new website whether you want to transfer the hosting or continue with your existing host.

- **Centralized content management**

With a powerful content management system, you can upload content, then use it on multiple pages, and style it differently on each page. If you update content once in the CMS, it updates everywhere.

- **Library-specific templates**

To get started quickly, choose from a selection of website templates designed just for libraries.

- **Translations**

With multi-language support built in for 180 languages, you can select your main site language and then add as many secondary languages as you wish with a click of a button. Promote resources, services, and programs to the entire community, in the language that meets their needs with multi-lingual content display.

- **Accessible and responsive**

Our templates are fully responsive and adhere to accessibility standards. Scan your site to pinpoint accessibility issues and make improvements.

- **Vega Program events integration**

For Vega Program customers, your website can be easily integrated to display events on your website and for visitors to stay updated.

- **Analytics and reports**

Site analytics show how visitors interact with your site in real-time. The analytics dashboard also provides helpful insights on activity, so you spend less time deciphering.

- **Security**

All sites use HTTPS and SSL protocols, providing security for your website and its visitors. Any data sent between your website and user's browser is encrypted, ensuring a safe browsing experience. Additional security measures include automated backups, and disaster recovery.
